P.E. (CIVIL) STUDY STRATEGY

CHAPTER 1

INTRODUCTION

1.1	Review for Structural Analysis	1-1
-----	--------------------------------------	-----

CHAPTER 2

FREE-BODY DIAGRAMS AND REACTIONS

2.1	Free-Body Diagrams	1-5
2.2	Resolution of Forces	1-7
2.3	Resultant of Forces	1-8
2.4	Equilibrium Equations	1-8
2.5	Example Problems	1-11
2.5.1	Example Problem 1 — Resultant of Forces	1-11
2.5.2	Example Problem 2 — Reactions of a Simple Beam	1-13
2.5.3	Example Problem 3 — Reactions of a Beam with Inclined Supports	1-14
2.5.4	Example Problem 4 — Reactions of a Compound Beam	1-16

CHAPTER 3

TWO-DIMENSIONAL EQUILIBRIUM PROBLEMS

3.1	General Considerations	1-21
3.2	Special Cases	1-22
3.2.1	Two-Force Body	1-22
3.2.2	Three-Force Body	1-22
3.3	Solution Techniques	1-22

3.4	Example Problems	1-23
3.4.1	Example Problem 1 — Beam with a Pulley	1-23
3.4.2	Example Problem 2 — Reactions of a Compound Frame	1-25
3.4.3	Example Problem 3 — Truss Supported by Three Links	1-28
3.4.6	Example Problem 6 — Overhanging Beam	1-30

CHAPTER 4

INTERNAL FORCES IN TRUSSES

4.1	Bar Forces in Plane Trusses	1-33
4.2	Discussion of Method of Joints	1-36
4.2.2	Case 1: One Vertical Member and One Horizontal Member .	1-37
4.2.2	Case 2: One Vertical Member and One Inclined Member	1-37
4.2.3	Case 3: One Horizontal Member and One Inclined Member .	1-38
4.2.4	Case 4: Both Members Are Inclined	1-39
4.2.5	Checking Bar Forces	1-43
4.3	Special Cases of Bar Forces	1-44
4.4	Example Problem	1-45
4.4.1	Example Problem 1 — Truss Member Forces by Inspection ..	1-45
4.5	P. E. Problem	1-47
4.5.1	P. E. Problem 1 — Simple Truss	1-47
4.6	Discussion of Method of Sections	1-53
4.7	Example Problems	1-55
4.7.1	Example Problem 1 — Compound Truss	1-55
4.7.2	Example Problem 2 — Simple Truss	1-57
4.7.3	Example Problem 3 — Truss Using Method of Joints	1-60

CHAPTER 5

INTERNAL FORCES IN BEAMS AND FRAMES

5.1	Shear Force, Bending Moment and Axial Forces in Beams and Frames .	1-63
5.2	Sign Conventions	1-63
5.2.1	Static Sign Convention	1-63
5.2.2	Deformation Sign Convention	1-64
5.2.3	Discussion	1-65
5.3	Shear Force and Bending Moment in Beams	1-66
5.4	Example Problem	1-68

5.4.1	Example Problem 1 — Internal Forces in a Bent	1-68
5.5	Relations Between Applied Loads, Shear, and Bending Moment	1-71
5.5.1	Important Concepts	1-73
5.6	Example Problems	1-75
5.6.1	Example Problem 1 — Beam with Left Overhang	1-75
5.6.2	Example Problem 2 — Shear and Moment Diagrams — Simple Beam	1-77
5.6.3	Example Problem 3 — Beam with Right Overhang	1-78
5.6.4	Example Problem 4 — Beam with Overhangs on Both Sides .	1-79
5.6.5	Example Problem 5 — Beam with Concentrated Moments ...	1-81
5.6.6	Example Problem 6 — Beams with Distributed Loads	1-84
5.6.7	Example Problem 7 — Beam with Linearly Varying Loads ...	1-86
5.7	P. E. Problem	1-88
5.7.1	P. E. Problem 1 — Timber Beam with Uniform Loads	1-88
5.8	Internal Forces In Frames	1-90
5.9	Example Problem	1-91
5.9.1	Example Problem 1 — Simple Frame	1-91

CHAPTER 6

INTERNAL STRESSES AND DEFORMATIONS

6.1	Stresses and Deformations in Truss Members	1-95
6.2	Stresses and Deformations in Beams	1-98
6.2.1	Shear Stresses and Deformations	1-98
6.2.2	Bending Stresses and Deformations	1-99
6.3	Stresses and Deformations Due to Torsion	1-100

CHAPTER 7

METHODS OF COMPUTING DISPLACEMENTS

7.1	Discussion of Various Methods	1-101
7.2	Beam Diagrams and Formulas	1-103
7.3	Factors 12,144 and 1728	1-104

CHAPTER 8

STATICALLY INDETERMINATE STRUCTURES

8.1	Introduction	1-105
8.2	Force and Displacement Methods	1-106

8.3	P.E. Problems	1-107
9.3.1	P.E. Problem 1 — Frame with Stiff Girders	1-107

CHAPTER 9

ANALYSIS OF STRUCTURES SUBJECTED TO LATERAL LOADS

9.1	Approximate Frame Analysis Methods	1-113
9.1.1	Portal Method	1-114
9.1.2	Cantilever Method	1-114
9.2	Example Problems	1-115
9.2.1	Example Problem 1 — Portal Method — Frame Analysis	1-115
9.2.2	Example Problem 2 — Cantilever Method — Frame Analysis	1-117

CHAPTER 10

INFLUENCE LINE DIAGRAMS

10.1	Introduction	1-121
10.2	Influence Lines for Reactions	1-122
10.3	Example Problems	1-122
10.3.1	Example Problem 1 — Influence Line Diagram for Reactions	1-122
10.3.2	Example Problem 2 — Influence Line Diagram for a Compound Beam	1-124
10.4	Influence Line Diagrams for Shears and Bending Moments	1-125
10.4.1	Influence Line Diagram for Shear	1-125
10.4.2	Influence Line Diagram for Moment	1-126
10.5	Example Problem	1-127
10.5.1	Example Problem 1 — ILD for a Compound Beam	1-127
10.6	P. E. Problem	1-130
10.6.1	P. E. Problem 1 — ILD for A Compound Beam	1-130
10.7	Absolute Maximum Bending Moment Under Moving Loads	1-131
10.8	P. E. Problem	1-132
10.8.1	P. E. Problem 1 — Absolute Maximum Moment for Moving Loads	1-132

CHAPTER 11

MULTIPLE CHOICE PROBLEMS

11.1	Multiple Choice Example Problems	1-135
11.1.1	Example Problem 1 — Stresses Due to Dead Load	1-135
11.1.2	Example Problem 2 — Wall Bending Movement	1-137

11.1.3	Example Problem 3 – Forces in a Three Hinged Frame	1-141
11.1.4	Example Problem 4 – Bar Forces in a Compound Truss	1-143
11.1.5	Example Problem 5 – Bar Forces in a Compound Truss	1-145
11.1.6	Example Problem 6 – Bar Forces in a Compound Truss	1-147
11.1.7	Example Problem 7 – Beam with Inclined Support	1-149
11.1.8	Example Problem 8 – Maximum Moment in a Beam	1-151
11.1.9	Example Problem 9 – Shear Force Diagrams	1-153
11.1.10	Example Problem 10 – Bending Moment Diagrams	1-155
11.1.11	Example Problem 11 – Three Span Continuous Beam	1-157
11.1.12	Example Problem 12 – Maximum Shear and Flexural Stress	1-159
11.1.13	Example Problem 13 – Deflection Under Loads	1-161
11.1.14	Example Problem 14 – Maximum Moment Under Moving Loads	1-163
11.1.15	Example Problem 15 – Maximum Shear and Bending	1-165
