SECTION 12 – WATER SUPPLY AND QUALITY

LIST OF FIGURES

LIST OF TABLES

ALPHABETICAL LIST OF SOLVED PROBLEMS

USEFUL CONSTANTS

REFERENCES

CHAPTER 1

INTRODUCTION

1.1	Description of Review Materials	12-1
1.2	Historical Development	12-1
1.2.1	Public Water Supplies in Early Times	12-1
1.2.2	Early Purification	12-1
1.2.3	Early Distribution Systems	12-2
1.2.4	Modern Purification in Europe	12-2
1.2.5	American Purification Development	12-2
1.2.6	Development of Other Treatment Processes	12-2
1.2.7	The Future	12-3

CHAPTER 2

HYDRAULICS, WATER TRANSFER, AND WATER COLLECTION

2.1	General Considerations	12-5
2.2	Water Sources	12-5
2.2.1	Rainfall	12-5
2.2.2	Surface Water Supplies	12-5
2.2.3	Ground Water Supplies	12-6
2.2.4	General Characteristics of Various Sources	12-6

2.2.5	Effect of Source on Water Quality	12-6
2.3	Pump Operation and Maintenance	12-7
2.3.1	The Mechanics of Pumping	12-7
2.3.2	Details of the Centrifugal Pump	12-8
2.3.3	Pump Operation and Maintenance	12-9
2.4	Valves	12-11
2.4.1	Types of Valves	12-11
2.4.2	Valve Maintenance	12-13
2.5	Meters	12-13
2.5.1	Need for Meters	12-13
2.5.2	Types of Meters	12-13
2.5.3	Flow Recording Devices	12-13
2.5.4	Accuracy of Meters	12-14
2.5.5	Maintenance of Meters	12-14
2.6	Important Parameters	12-14
2.6.1	Useful Conversion Factors and Formulas	12-14
2.6.2	Useful Tables and Nomographs for Fluid Flow	12-18
2.7	P. E. Problems on Fluid Flow	12-22
2.7.1	P. E. Problem 1 — Pump Data	12-22
2.7.2	P. E. Problem 2 — Pump Performance	12-24
2.7.3	P. E. Problem 3 — Pipe Discharge	12-26
2.7.4	P. E. Problem 4 — Weir Discharge	12-27
2.7.5	P. E. Problem 5 — Open Channel	12-28
2.7.6	P. E. Problem 6 — Pipe Flow	12-30
2.7.7	P. E. Problem 7 — Pump Power Output	12-31
2.7.8	P. E. Problem 8 — Unconfined Well Discharge	12-33
2.7.9	P. E. Problem 9 — Confined Well Discharge	12-35
2.7.10	P. E. Problem 10 — Watershed Yield	12-37
2.7.11	P. E. Problem 11 — Watershed Collection Reservoir	12-39
2.7.12	P. E. Problem 12 — Reservoir Size and Distribution System Flow	12-40
2.7.13	P. E. Problem 13 — Water Loss Importance	12-43
2.7.14	P. E. Problem 14 — Box Culvert Size	12-44
2.7.15	P. E. Problem 15 — Water Treatment Plant	12-46
2.7.16	P. E. Problem 16 — Fire Protection Requirements	12-48

2.7.17	P. E. Problem 17 — Reservoir Capacity	12-49
--------	---	-------

CHAPTER 3

WATER TREATMENT

3.1	Introduction	12-51
3.2	Chemical Character of Water	12-51
3.2.1	Nature of Water	12-51
3.2.2	Ionization	12-52
3.2.3	Hydrogen Ion Concentration	12-53
3.2.4	Natural Waters as Mineral Solutions	12-53
3.2.5	Common Ions in Natural Waters	12-54
3.2.6	Alkalinity	12-54
3.2.7	Hard Water	12-55
3.2.8	Miscellaneous Ions in Natural Water	12-56
3.3	Chemical Arithmetic	12-56
3.3.1	Weight, Volume and Flow Rate Factors	12-56
3.3.2	Chemical Factors	12-56
3.3.3	Equivalent Weights	12-57
3.3.4	Normal Solutions	12-57
3.3.5	Dosage Calculations	12-58
3.4	Filtration	12-59
3.4.1	Need for Filtration	12-59
3.4.2	Types of Filters	12-59
3.4.3	Parts of a Rapid Sand Filter Plant	12-61
3.4.4	Filter Operating Precautions	12-62
3.5	Chemical Pre-Treatment	12-62
3.5.1	Three Conditions of Solids in Liquids	12-62
3.5.2	Examples of Suspended Matter	12-62
3.5.3	Coagulation	12-63
3.5.4	Flocculation	12-63
3.5.5	Common Coagulants	12-64
3.5.6	Coagulant Aids	12-64
3.5.7	Mechanical Steps in Coagulation	12-64
3.5.8	Sedimentation	12-64
3.5.9	Chemical Feeders	12-65

3.6	Softening	12-65
3.6.1	Reasons for Softening Water	12-65
3.6.2	Softening by Lime and Soda Ash	12-66
3.6.3	Softening by Base Exchange	12-67
3.6.4	Mechanics of Base Exchange in Large Plants	12-69
3.6.5	Demineralization or Deionization	12-70
3.6.6	Consumer Softening Versus Municipal Softening	12-70
3.7	Corrosion	12-70
3.7.1	Corrosion Versus Erosion	12-70
3.7.2	Corrosion of Metals in Water	12-71
3.7.3	Control of Corrosion	12-72
3.7.4	Corrosion Products of Iron	12-72
3.8	Disinfection	12-73
3.8.1	Purpose of Disinfection	12-73
3.8.2	Methods of Disinfection of Water	12-73
3.8.3	forms of Chlorine	12-74
3.8.4	Nature of Elementary Chlorine	12-74
3.8.5	Shipment of Chlorine	12-74
3.8.6	Hypo-Chlorinators	12-75
3.8.7	Gas Chlorinators	12-75
3.8.8	Special Applications of Chlorination	12-75
3.9	Unit Definitions and Formulas Related to Water Treatment	12-76
3.9.1	Units	12-76
3.9.2	Chemical Ion and Compound Data	12-77
3.9.3	Formulas	12-77
3.10	P. E. Problems on Water Treatment	12-78
3.10.1	P. E. Problem 1 — Water Well Sterilization	12-78
3.10.2	P. E. Problem 2 — Rapid Sand Filter Plant Features	12-79
3.10.3	P. E. Problem 3 — Water Treatment	12-81
3.10.4	P. E. Problem 4 — Use of Chemicals	12-83
3.10.5	P. E. Problem 5 — Flocculator Design	12-84
3.10.6	P. E. Problem 6 — Sedimentation Basin Design	12-86
3.10.7	P. E. Problem 7 — Rapid Sand Filter Plant Size	12-88
3.10.8	P. E. Problem 8 — Rapid Sand Filter Capacity	12-91

3.10.9	P. E. Problem 9 — Rapid Sand Filter Design	12-93
3.10.10	P. E. Problem 10 — Zeolite Softening	12-96
3.10.11	P. E. Problem 11 — Hydrogen Sulfide Gas Removal	12-98
3.10.12	P. E. Problem 12 — Break Point Chlorination	12-99
3.10.13	P. E. Problem 13 — Aluminum Sulphate Coagulation	12-100
3.10.14	P. E. Problem 14 — Ferric Chloride Coagulation	12-101
3.10.15	P. E. Problem 15 — Dissolved Solids Composition	12-102
3.10.16	P. E. Problem 16 — Lime Treatment	12-104
3.10.17	P. E. Problem 17 — Lime-Soda Ash Treatment	12-106
3.10.18	P. E. Problem 18 — Zeolite and Lime-Soda Ash Softening ...	12-108
3.10.19	P. E. Problem 19 — Zeolite Plant Design	12-110
3.10.20	P. E. Problem 20 — Zeolite Plant Design	12-112
3.10.21	P.e. Problem 21 — Water Treatment Plant	12-114
3.10.22	P. E. Problem 22 — Lime-Soda Ash Softening	12-115
3.10.23	P. E. Problem 23 — Water Softening Requirements	12-116

CHAPTER 4

PUBLIC HEALTH ENGINEERING

4.1	Introduction	12-117
4.2	Sanitary Water Quality	12-117
4.2.1	Disease-Producing Organisms	12-117
4.2.2	Water-Borne Diseases	12-118
4.2.3	Non-Water Borne Diseases	12-118
4.2.4	Sources of Water Pollution	12-118
4.2.5	Animal Pollution	12-118
4.2.6	Control of Bacterial Pollution	12-119
4.3	Tastes and Odors in Water	12-120
4.3.1	Sources of Tastes and Odors	12-120
4.3.2	Prevention of Tastes and Odors	12-120
4.3.3	Removal of Tastes and Odors	12-120
4.4	Bacterial Tests for Water Quality	12-121
4.4.1	Necessity for Tests	12-121
4.4.2	Laboratory Tests for Disease Organisms	12-121
4.4.3	Coliform Group of Intestinal Organisms	12-121
4.4.4	Plate Count	12-122

4.4.5	Precautions in Bacterial Testing	12-122
4.4.6	Quantitative Estimates of Pollution	12-123
4.4.7	U.S. Public Health Service Standards for Treated Water	12-123
4.5	Responsibility and Records	12-123
4.5.1	Responsibility of Water Utility to Consumers	12-123
4.5.2	Responsibility of Water Utility to Governmental Agencies ...	12-123
4.5.3	Legal Responsibility	12-124
4.6	Example Problems	12-125
4.6.1	Example Problem 1 — Bacteria in Water	12-125
4.6.2	Example Problem 2 — Sanitary Water Quality	12-125
4.7	P. E. Problems on Disease Vector Control Engineering	12-126
4.7.1	P. E. Problem 1 — Malaria Disease Treatment	12-126
4.7.2	P. E. Problem 2 — Tuberculosis Reporting	12-127
4.7.3	P. E. Problem 3 — Milk Disease Prevention	12-128
4.7.4	P. E. Problem 4 — Disease Transmission	12-129
4.7.5	P. E. Problem 5 — Typhoid Fever Investigation	12-130

CHAPTER 5

MISCELLANEOUS NOTES AND TABLES

5.1	Miscellaneous Notes and Tables	12-131
-----	--------------------------------------	--------
